The Biology of History – Ascent of Women: Virendra Pandit; Partridge India/Penguin Books India Pvt. Ltd., 11, Community Centre, Panchsheel Park, New Delhi-110017.

*In his inter-disciplinary book that draws on several sources, Pandit argues that it is now the turn of multi-tasking women to dominate the new world. They will, he says, replace the single-tasking men who created and controlled religions and then science and technology. For the first time since the dawn of civilisation, women will thus come to dominate all spheres of life.*
